At MAKERS, we are committed to engineering laminates that combine aesthetic excellence with lasting performance, backed by advanced manufacturing, precise quality control, and a strong foundation in innovation, precision, and reliability since our inception in 2016 under Ajmer Industries LLP. Using ISI-certified 100% phenolic resin papers and adhering to ISO 9001 for quality, ISO 14001 for environmental responsibility, and ISO 18001 for health and safety, we ensure that every sheet meets the highest global benchmarks.

Expanding our portfolio, we now present the Solid Laminates Collection a curated range of vibrant and timeless hues developed through meticulous color calibration, uniform surface finishing, and a rigorous system that covers every stage from concept development to climate-stress testing, deep-layer bonding, uniform sanding, and consistent lamination thickness, culminating in visually stunning surfaces.

Designed for versatility across residential, retail, and commercial spaces, this collection empowers architects, designers, and homeowners to achieve impactful spaces with colors that stay true over time, backed by our dedicated after-sales support, structured warranty, and expert installation guidance.

Quality engineered, design inspired, and service assured, that's the MAKERS promise: surfaces that not only beautify but also endure.

Edge Defects	20 max	✓
Broken Corner	One Broken corner of < 30 mm Or two broken corner of < 15 mm allowed	✓
Sanding Defects	Slight chatter Marks are allow	✓
Warping	Max warp 120 mm	✓
Dimension	A. Length B. Width	✓
Straightness of Edge	1.5 mm/M²	✓
Squareness	1.5 mm/M²	✓
Resistance to Surface Wear Revolution (Min) Index No	Not Less than 150 (revolution)	✓
Resistance to Immersion in Boiling Water	A. Mass increase % Max B. Thickness increase % Max C. Appearance Grade not worse than	✓
Dimensional Stability at deviated Temp. (Max)	A. Length wise (L) % B. Cross Wise (T) %	✓
Resistance to Scratching , Index No	Not less than 2	✓
Resistance to Staining Grade not worse than	A. Group 1 & 2 B. Group 3 & 4	✓
Resistance to Steam (Appearance Grade not worse than)	Not less than 4	✓
Resistance to Impact by small dia ball (Min), Index No	Not less than 3	✓
Resistance to cracking (Appearance Grade not worse than)	Not less than 4	✓
Resistance to Colour change (Wool standards) -In Xenon arc light In enclosed carbon arc light	Not less than Standard Blue Wool No. 6	✓
Surface Finish and reverse side bonding	The reverse side of sheets having only one decorative surface shall be suitable for adhesive bonding if so required	✓

Remarks : Sample confirms to IS : 2046 : 1995 Requirements

NOTES :

- Size : 2440 mm x 1220 mm [8'x4']
- Thicknesses : 1.00 mm (other thickness available on request)
- Notes :
 - All tests may not be valid for metallic and gloss laminates.
 - Samples pasted, represent only color, pattern and finish and not actual thickness.
 - There may be slight variation in shades in batch to batch, particularly in metallic designs.
 - Bonding of laminates under high humidity, plywood with high moisture content, ply with uneven surface, inferior quality adhesive and insufficient pressure may lead to delamination/ air bubbles in between ply and laminate.
 - MAKERS DECORATIVE LAMINATES are used for various applications, without the possibility of control over the manufacturing of the finished products, the company does not assume obligations or liabilities arising from the furnishing, sale, installation or repair, use or subsequent sale of any product, to any person or entity.
 - AJMER INDUSTRIES LLP warrants that its products are reasonably free from manufacturing defects. The products when properly used, will comply, with normal deviations, related to manufacturing specifications. This warranty shall be limited only to the original buyer for a period of care. It is recommended that the products must be inspected prior to installation and our liability will be limited to the extent of the cost of the products only.

Do not use chemicals
for cleaning

Extra care required in vertical
pasting of laminates sheet as
there is possibility of bubbles due
to lack of uniform pressure

Avoid direct sunlight/
continuous light. These
may cause color fading

Cracking at corners and
around cuts may becaused by
improper conditioning,
improper bonding, and poor
planning. Avoid all these to prevent
cracking at corners.
